

## Press release

*ITS Monitor and Report Box go mobile*

### **iPhone App from ecofinance**

**Graz, 19<sup>th</sup> April 2010 – ecofinance Finanzsoftware & Consulting GmbH, one of the leading software providers in international treasury management, has launched its first “emc” - ecofinance mobile client – in collaboration with easyMOBIZ. ecofinance customers can now access and use relevant functionalities from the Integrated Treasury System ITS via their iPhone.**

The iPhone enables customers to call up two important ITS functions when on the move: ITS Monitor and ITS Report Inbox.

The traffic light system in ITS Monitor enables users to access information on the current status of the global financial processes, at any time and from any location. User-defined monitor queries are used to continually check the current status of the overall treasury system and the individual financial processes. Workflows, in addition to limits and maturities, can be monitored automatically, similarly to in the local office system.

The ITS Report Inbox displays all the reports for the electronic inbox that is integrated into the system. By touching the screen, users open these PDF files on their iPhones, where they can also directly select, delete or forward the read or unread files. Users can access the app from any location to quickly and securely obtain information on the current financial status of the company, inventory lists, maturity lists, maturity structures, evaluations and simulations, interest calculations or individual reports.

In order to guarantee total data security for ITS mobile access, authorisations and security levels are defined beforehand on the local server. A secure and encrypted connection to the Integrated Treasury System ITS is

## Press release

### **ecofinance Finanzsoftware & Consulting GmbH**

*ecofinance is one of the leading software providers in international treasury management. In its role as a professional and reliable partner to global groups, the company has been offering its Integrated Treasury System ITS since 1984. Close cooperation with different universities and experts simultaneously allows the profound and systematic enhancement of the modular system. With integrated software solutions and one-to-one support, ecofinance supports companies in their treasury, cash and risk management, in financial planning, in payments management and in reporting. ITS is being used across the globe – group subsidiaries are integrated simply and easily into the system. As Application Service Providers (ASP), financial institutions can offer their corporate clients access to professional cash management, cash pooling and treasury management with the software from ecofinance. Numerous businesses and reputable banks have been using integrated systems from ecofinance for more than 20 years. Amongst these are Bilfinger Berger, Schörghuber Unternehmensgruppe, Bosch, Müller Drogeriemärkte, Deutsche Bahn, Flughafen München, STRABAG, Zumtobel, ZF Friedrichshafen, REWE, Wilh. Werhahn, Giesecke & Devrient, Lindt and many more. Reputable banks such as UniCredit Group, Commerzbank, Raiffeisen Zentralbank and Swedbank use the integrated systems by ecofinance.
